Exercise

Objective

The objective of this task is to have some hands-on-practice with:

- Collections
- Functions
- Packing and Unpacking

Overview

A user acts as a reader and asks another user, who doesn't know the story, to write adjectives, nouns, verbs, adverbs etc. These words are then inserted into the story.

Write a Python script that has:

- Come up with a story with some blank spaces
- Ask users for input and store them in your chosen collection
- Use collection to fill in the blanks in your story
- Organize code in functions
